## SKILLS

Wireframe Creation

Problem-Solving

Adaptability

Front-end Coding

Computer Literacy

Fast Learner

Back-end Coding

Agile Methodologies

Touch Typing approx. 90 wpm

Research

TypeScript

React

## EXPERIENCE

### BUSINESS SYSTEMS OPERATOR

LJ Hooker Morrinsville | 2024

My daily responsibilities include website maintenance, ensuring that content and technical aspects of the site are updated and functioning smoothly. I also have the responsibility of writing contracts, collaborating with lawyers to ensure accuracy, and liaising with legal professionals as needed. As the front of office representative, I am the first point of contact for customers, handling phone calls and providing information. Additionally, I am involved in social media marketing and budgeting, helping to manage campaigns and ensure effective allocation of resources.

### FULL STACK DEVELOPER (STUDENT)

Dev Academy Aotearoa | 2024

Throughout my time at Dev Academy, I have come to appreciate the idea of continued development and learning strategies. It included 800 hours of learning, weekly group projects and daily pair programming or solo work.

Some of the useful tools and languages I have learnt and practiced include: JavaScript, TypeScript, Git, React, Node.js, SQLite3 database creation and database management. I've also been introduced to basic authentication with Auth0, external API's, front-end testing and back-end testing. A large focus of this course is also the development of soft-skills such as communication, receiving feedback, etc. This is enforced with completing multiple group projects.

### CUSTOMER INITIALISATION SPECIALIST

Red Energy (Melbourne-based) | Sep 2023 - Nov 2023

I was only in this role for about 2-3 months (Melbourne based) before needing to return home to NZ due to family illness. My role's function was to read a script to our customers to gain their explicit and informed consent for signing up with Red. When beginning the role, it involved learning a lot of new systems/applications that the company used, new processes, inductions, etc. The main focus and enjoyable part was the team culture and talking to awesome customers all day. It was a wonderful experience to speak with customers all day from a call centre as well as learn from such an amazing company.

## ADMINISTRATION SUPPORT

Seeka Limited | Dec 2022 - May 2023

Co-ordinating projects and activities, dispatching, working as part of a call centre and organisation were key responsibilities of this position. It also involved a lot of collaboration, communication, reporting to the assistant manager, rostering staff and assisting with payroll at a basic level. I also assisted with asset management of company cars and phones on a basic level. Reason for leaving: contract ended / kiwifruit season ended.

## ADMINISTRATION SUPPORT / HANDY PERSON

Odd Jobz TGA | Apr 2022 - May 2023

This was an administrative role as well as helping with other odd jobs. It included liaising with customers, suppliers (such as Bunnings) and booking appointments for the owner. I mostly replied to customer queries on social media and text, but also handled some phone calls and emails. When I wasn't doing this, I was helping with the physical work such as house moves and gardening.

## PERSONAL TRAINER AND SALESPERSON

Legacy Nutrition and Fitness | Mar 2021 - Apr 2022

Here, I worked as a personal trainer in a studio, building relationships and helping my clients achieve their goals. When I wasn't doing this, I was helping the store to sell supplements in a customer-facing role. Much of my time was spent advertising products and building/managing my E-commerce website (on Shopify). There was also a lot of picking and packing of orders involved and inventory management. I learnt a lot about social media marketing, in-person and online sales, as well as time management, basic payroll functions and more.

## TICKET SALES AND RIDE OPERATOR

Auckland Adventure Park | Aug 2019 - Mar 2021

Focusing on customer service, I mainly spent time in reception, where I sold tickets at the kiosk and helped with any customer enquiries. When I wasn't doing this, or if someone called in sick, I would be working as a ride operator to ensure health and safety was the highest priority. This role began as part-time while I completed my last year of high school and then moved to more full-time hours after school finished and during school holidays (apart from the break during lockdown).

## EDUCATION

### FORAGE - DATACOM | JUNE 2024

Datacom - Software Development Job Simulation

### DEV ACADEMY AOTEAROA | MAY 2024

Level 6 Applied Software Development Qualification

### PROJECT LANEWAYS | APRIL 2023
